

Schneider Electric C-Bus

Conditions of Course's

Provided by

Discrete Solutions Ltd

Course Pre-Requisites:

It is the responsibility of the delegate when registering for a course; they make sure they meet any pre-requisites that may be applicable to the course being held.

All courses involve programming, so it is essential the delegate has a laptop of some description, and they fully conversant with the usage of their machine and are able to make adjustment to the settings if required.

Programming of the C-Bus equipment used during the courses require the use of Ethernet (Wired or Wireless) and USB serial connections. All laptops being used must have these ports available for use.

Software Requirements:

All software needed to be used during the courses will be detailed in the course itineraries. The delegates must download and install any software packages listed, but as a minimum **Toolkit** and **PICED** software packages must be installed before they arrive for training.

During the installation process you may be asked to also install third party software from the internet like Windows .Net Frameworks as well. Please make sure these are all installed and operate as we cannot guarantee access to an Internet connection in the training rooms to download any additional software that may be needed.

The Clipsal Software packages for C-Bus can be downloaded from: <http://www2.clipsal.com/cis/technical/download>

To use the Free Smartphone application which allows C-Bus to be controlled using Wiser and Smartphones / tablets; download the Wiser2 App from App Store or Play Store.

Compatibility:

The Clipsal C-Bus Software is compatible with Windows 7, and it is strongly recommended Windows Laptops are only used during this course.

APPLE: Although the software can be run on Apple machines (using software like Parallels) it is important the user is fully conversant with APPLE products and they are able to adjust settings and manage the admin of their machines. Failure to adhere to these requirements will result in the attendee not being able to fully participate in the course if they are unable to connect their Laptops to the training equipment.

Course Fee:

Course fee's are payable in advance **ONLY!**

Payment for the full amount of the course must be made at least 10 working days prior to course date. If no payment has been received within this period then the delegate will have their status changed from "**Confirmed**" to "**Provisional**"

Where Provisional reservations have been agreed and no payment has been taken, then these are subject to cancellation 7 days prior to the commencement of the course date in order to accommodate those on the waiting list which have paid in full for the course. You will be notified of this and given the opportunity to pay in full immediately that day to remain booked on the course as "**Confirmed**".

An email shall be sent by the course provider acknowledging you are entitled to attend the course. This confirmation must be brought with you on the day of the course to provide proof of payment and your ability to participate in the day's course.

Requests for cancellation of a pre-booked and confirmed course placement must be made in writing least 10 days before the course date to get a full refund of the course fee. Cancellations after this period will result in the course fee will being forfeited. You will then need to rebook a new course and pay the applicable fee to be enrolled in that course. Previously paid course fees cannot be rolled forward to a new course.

Course Material:

A course manual shall be provided for each delegate to follow the course notes and to participate in the creation of the course programming.

These manuals are subject to normal laws of copyright and attendance on the course does not confer any right to reproduce the information provided, or to disclose it to third parties without prior permission of Discrete Solutions Ltd.

The information provided in the course documentations may be changed without notice and no updates shall be provided for previous courses held.

All training aid's like equipment rigs will be provided for the delegate to practice on and to download the course exercises during the day.
